EDUCATION

Washington University in St. Louis (WASHU)

Aug 2022 - May 2026

B.S. in Computer Science | **GPA: 3.93/4.00**

St. Louis, MO

- Coursework: Cloud Computing with Big Data Applications, Rapid Prototype Development, Machine Learning & Artificial Intelligence, Parallel Programming, Object-Oriented Software Development, Data Structures & Algorithms

EXPERIENCE

Zaiko AI

Aug 2024 - Present

Full Stack Software Engineer (part-time)

St. Louis, MO

- Company Summary: A start-up creating an automated inventory management solution for grocers; actively working with 7+ grocers across St. Louis
- Designed a UPC scanner that replaced the manual entry of product UPCs, reducing data entry times by **80%**.
- Automated the process of product ordering for inventory restock, eliminating manual labor by **95%** while reducing duration of the process by **92%** per order.
- **Technologies:** React.JS, Python (FastAPI, Selenium), AWS

Institutional Research - Washington University in St. Louis

May 2024 - Aug 2024

Software Engineer

St. Louis, MO

- Programmed **10+** ROS programs to improve autonomous robot navigation in obstacle-filled environments, resulting in **60%** less collisions and course completion **90%** of the time.
- Worked in a 3-person team to develop a C++ local planner plugin for the ROS Navigation Stack, improving autonomous driving and obstacle avoidance by **30%**.
- **Technologies:** ROS, Python (Numpy), C++

PROJECTS

Expi-Tracker | React, Typescript, Python, PostgreSQL, AWS RDS

May 2025 - Present

- Developing an app that allows grocery stores to keep track of expiring products in their store via barcode scanning
- Utilizing FastAPI, Pydantic, and SQLAlchemy to make smooth additions to database of products and expiration dates
- Incorporating access and refresh tokens along with a block-list through Redis to prevent XSS attacks and ensure user safety

Check Cashing Web App | Vue.js, Laravel, PostgreSQL

Apr 2025

- Designed and built a check cashing application to manage check-based transactions with customers.
- Included a customer ID image field to mitigate cases of stolen identity or checks, saving users time and money.
- Integrated Google Places API to provide customer address autocomplete, improving user experience and data accuracy.

Chatroom | JavaScript, Socket.IO, CSS, AWS

Mar 2025 - Apr 2025

- Built a real-time chat application allowing users to create and join chat rooms, interact in a main lobby, and communicate smoothly using Socket.IO.
- Integrated private messaging, user blocking, and admin controls for banning/kicking users, improving user experience.
- Implemented password-protected rooms and user authentication features, increasing security within the app

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner – Interactive certification for fundamental AWS services

Jun 2025

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, PHP

Web & Backend: React.js, Vue.js, Node.js, Laravel, FastAPI, Socket.IO, Selenium, Jinja, Spring Boot

Cloud & Databases: AWS (EC2, VPC, RDS), PostgreSQL, MySQL

Developer Tools: Git, GitHub, Docker, Kubernetes
